SKYSTREAM 3.7[®]

2.4 KW RESIDENTIAL POWER APPLIANCE

Take Control of Your Energy Needs

Designed for homes and small businesses, the Skystream 3.7[®] converts wind into clean electricity you can use. It's the first compact, user-friendly, all-inclusive wind generator (with controls and inverter built in) designed to provide quiet, clean electricity in very low winds.

With a rated capacity of 2.4 kW, Skystream can provide anywhere from 40%-90%¹ of a household's or small business's total energy needs. And because it operates at a low RPM, Skystream is as quiet as the trees blowing in the wind.
